

TECHNICAL HIGHLIGHTS

- Built cloud-native backend processing 5,000+ resumes
- Deployed applications using AWS, Jenkins & Terraform
- Designed REST APIs with Spring Boot microservices
- Research experience in NLP and speech analysis

SKILLS

Languages:
Java, Python, SQL, JavaScript, TypeScript

Frameworks:
Spring Boot, REST APIs, Microservices, React

Cloud & DevOps:
AWS (EC2, S3, Lambda), Docker, Jenkins, Kubernetes, Terraform, CI/CD

Analytics & Tools:
MySQL, Firebase, Git, Postman

CERTIFICATIONS

- AWS Academy – ML Foundations
- Oracle Certified Foundation
- CISCO Networking
- SCALAR (DBMS)
- Unity Essentials Pathway
- Programming in C

KEY ACHIEVEMENTS

SRM Hackathon 8.0
Competed in SRM's flagship hackathon, building innovative tech solutions under time pressure.

Norwegian Embassy Volunteer
Selected as a volunteer for a prestigious international event, demonstrating leadership and communication skills.

Walmart Global Tech Simulation
Completed industry simulation showcasing real-world software engineering practices.

ANKITA KUMARI

Backend & Cloud Engineer | Java · Spring Boot | AWS · Microservices | CI/CD

aankitak91@gmail.com | 8809366345 | [Linked In](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Backend Engineer building scalable cloud-native applications using Java, Spring Boot, and AWS. Experienced designing REST APIs and microservices, automating deployments with Jenkins and Terraform, and optimizing SQL-backed systems.

PROJECTS

AI Resume Sorter

Java · Spring Boot · Python · NLP · React · TypeScript · AWS · CI/CD · Jenkins · Terraform · JUnit

- Engineered a Spring Boot + Python microservices backend with NLP-based candidate ranking, exposing REST APIs that processed 5,000+ resumes; deployed on AWS (EC2, S3, Lambda) via automated Jenkins/Terraform CI/CD pipelines.
- Reduced manual screening effort by ~60% by analyzing keyword match rates using SQL; improved system scalability using asynchronous filtering pipelines and a TypeScript React frontend with real-time ranking dashboards.

Smart Finance Advisor

Python · Spring Boot · SQL · Excel · Data Analysis · Rule-based AI

- Built a Spring Boot + Python rule-based financial recommendation engine; analyzed 1,000+ financial records to identify spending patterns and optimize budgeting, improving simulated user savings rate by ~15%.
- Developed Excel dashboards for expense tracking and trend analysis; delivered actionable insights via KPI-driven financial analysis and leakage modelling with MySQL.

EXPERIENCE

Intern – Software Development Intern

SAIL (Steel Authority of India Limited)

India

- Improved application usability by **30%** by implementing responsive web interfaces and optimizing application workflows, reducing user interaction steps by **25%** through usability analysis and iterative improvements.
- Collaborated with developers, designers, and stakeholders in an **Agile/Scrum** environment to translate business requirements into production-ready software features, participating in testing, debugging, and feature validation to ensure quality deliverables.

Committee Head – CSI Committee

Aaruush, SRM University

Chennai, India

- Drove end-to-end digital strategy across social media platforms — managed content calendars, advertising campaigns, and publicity drives contributing to 5,000+ event attendees; tracked reach, engagement KPIs, and campaign ROI using Excel.
- Led sales operations and sponsorship acquisition; delivered creative pitches to corporates, managed budget planning, and executed crowd & crisis management across large-scale operations.

EDUCATION

B. Tech in Computer Science & Engineering

2022 – 2026

SRM Institute of Science and Technology

CGPA: 8.04

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, AI, Machine Learning, Cloud Computing, DevOps, Full Stack Development

RESEARCH & PUBLICATIONS

VoiceShield AI – Real-time Voice Threat Detection and Monitoring

- IEEE-style research paper developed under faculty mentor K. Ishwarya.
- Worked on NLP, speech emotion recognition, scam detection, speaker verification, and multimodal AI-based threat analysis systems.
